## Software Compatibility

### Summary

This document outlines the Trimble data collectors, the versions of Trimble embedded software, and the Microsoft Windows operating systems that are compatible with versions of the GPS Pathfinder® Office software.

### Trimble data collector and embedded software

When Trimble releases new data collectors and versions of embedded software, it often releases a new version of GPS Pathfinder Office to support the new features introduced into the data collectors and embedded software. To ensure compatibility between your data collector and embedded software, and GPS Pathfinder Office, it is important that you have the correct version of each. The following table outlines the versions of data collectors and embedded software that is compatible with each version of GPS Pathfinder Office.

Trimble data collector and embedded software	Version	GPS Pathfinder Office version

## Data Transfer utility

The Trimble Data Transfer Utility transfers data from a range of devices to your PC. You can then import the data into the GPS Pathfinder Office or Trimble Geomatics Office™ software.

Devices that you can download data from include:

- All Mapping and GIS data collectors
- Trimble Survey Controller™
- Trimble Survey Pro
- Trimble 3300
- Trimble Series 3600 instruments
- Trimble Series 4000 and 5000 receivers
- Trimble Series 5600 instruments
- DiNi Digital Level

The Trimble Data Transfer software is available free from the Trimble website ([www.trimble.com/datatransfer.html](http://www.trimble.com/datatransfer.html)).

**Note:** Although you can use the Data Transfer utility to download data from any Mapping & GIS data collector irrespective of the version of GPS Pathfinder Office you have, the files from your data collector may not be compatible with your version of GPS Pathfinder Office because of the functionality in that data collector. Check the table on page 1 for compatibility information.
