Laserplane One "Man" leveling system

NSN: 6675-01-153-0985

System Components:

L500C: Laserplane System to include 1 each transmitter (725' diameter range).

1275: Laser Eye Receiver with general-purpose rod clamp.

2161: Aluminum Tripod.

984: General-purpose grade rod.

EW236-1 Warranty: 3 years use or abuse.

Description: This system is used as a one man leveling crew. It is used for all the same jobs as an optical level, but requires only one worker. The Laserplane transmitter (Operating unmanned) sends a continuous **self- leveled** 360-degree reference plane over the work area. This Reference can be picked-up by one or more receivers simultaneously, which may be hand held or attached to a grade rod. This Laserplane reference is used for **all** construction and surveying applications... setting and adjusting elevations, marking grade stakes, checking and setting elevations cutting depth, etc.

Laserplane Leveling Systems are everywhere you currently use an optical level.

These Systems require only ONE WORKER.

(Critical operating requirements and features/functions available upon request.)
